

RUN-N-SMOOTH

N-SCALE POWERKEEPER

CKT-DCCSA

The Run-N-Smooth PowerKeeper is a micro-size stay alive module that improves the running quality of N-scale and space-constrained DCC locomotives. With integrated protection circuitry and built using micro capacitors, the Run-N-Smooth PowerKeeper provides a simple, easy, and safer alternative for small installations.

Features

- Ultra small for N-scale locomotives
- 940uF typical capacitance
- Integrated protection circuitry
- Safer tantalum polymer capacitors
